

Civil Engineering

The Department of Civil, Construction, and Environmental Engineering (CCEE) offers master's and doctoral level programs as well as graduate certificates. Graduate students are exposed to cutting-edge research covering various facets of civil engineering theory and practice. Knowledgeable and experienced faculty members work closely with students to provide them with the tools required to succeed professionally in globally competitive work environments.

Program	Coordinator	Room	Phone Number
Certificates	Nasim Uddin, PhD	Hoehn Engineering Building, Room 321	(205) 934-8432; nuddin@uab.edu

Category A certificates are offered by the Department of Civil, Construction, and Environmental Engineering. Any undergraduate or graduate student in good standing who is pursuing a Civil Engineering degree (BSCE, MSCE, or PhD) may elect to simultaneously complete the requirements of his or her degree program and the Certificate Program.

These certificates are listed on student transcripts and in the university graduation bulletin.

Certificates can be earned in:

- Construction Engineering Management
- Environmental Engineering
- Geotechnical Engineering
- Structural Engineering
- Sustainable Engineering
- Transportation Engineering

Civil Engineering (BSCE) graduates who complete the Certificate Program will have greater depth in a specific technical area. The certificates also allow a means for practicing engineers to acquire expertise beyond a Bachelor's degree, and have it formally recognized without completing a program leading to a Master's degree. This technical expertise will enhance their proficiency and marketability. Up to 12 graduate level credit hours taken for a certificate may be applied toward the MSCE degree.

The requirements are as follows:

- Students must be admitted to the Department as either undergraduate (BSCE) or graduate (MSCE) students in Civil, Construction, and Environmental Engineering or hold a BS in Civil Engineering or a closely related field from an accredited institution.
- Certificates require a minimum of 15 credit hours consisting of five graduate level elective courses in the area of specialization. Certificates for undergraduate students will be awarded upon completion of the BSCE degree.
- Graduate level elective courses taken may be applied to the certificate as well as a MSCE degree.
- One course, up to three credit hours, may be transferred from another institution.
- Courses taken from University of Alabama, University of South Alabama, and University of Alabama in Huntsville via Intercampus Interactive Telecommunications System (IITS) may be applied to certificates with prior approval of the certificate program director.

- Elective course may be taken at the 500, 600, or 700 level. Special topics courses (CE 590, CE 690, CE 790) may be applied to certificates with prior approval of the certificate program director.

Certificate in Construction Engineering Management

Requirements	Hours
Prerequisite Course	
CE 497 Construction Engineering Management (or equivalent)	
Select 15 credits from the following:	15
CE 575 Construction Safety and Health Management	
CE 600 Sustainable Construction	
CECM 669 Advanced Project Management	
CECM 670 Construction Estimating and Bidding	
CECM 671 Construction Liability & Contracts	
CECM 672 Construction Methods and Equipment	
CECM 673 Project Planning and Control	
CECM 674 Green Building Design/Construction	
CECM 675 Advanced Construction and Engineering Economics	
CECM 676 Construction Project Risk Management	
CECM 688 Construction Management and Leadership Challenges in the Global Environment	
CECM 689 Building Information Modeling (BIM) Techniques	

Certificate in Environmental Engineering

Requirements	Hours
Prerequisite Courses	
CE 236 Environmental Engineering (or equivalent)	
CE 337 Hydraulics (or equivalent)	
Select 15 credits from the following:	15
CE 530 Water Supply/Drainage Design	
CE 533 Solid and Hazardous Wastes Management	
CE 534 Air Quality Modeling and Monitoring	
CE 580 Introduction to Water and Wastewater Treatment	
CE 608 Green Building Design	
CE 640 Wastewater Treatment Engineering	
CE 685 Engineering Hydrology	
CESC 600 Principles of Sustainable Development	
CESC 602 Introduction to Sustainable Smart Cities	

Certificate in Geotechnical Engineering

Requirements	Hours
Prerequisite Course	
CE 332 Soil Engineering (or equivalent)	
CE 332L Soil Engineering Laboratory (or equivalent)	
Select 15 credits from the following:	15
CE 516 Mechanical Vibrations	
CE 520 Advanced Mechanics	
CE 526 Foundation Engineering	
CE 560 Structural Mechanics	
CE 562 Advanced Structural Analysis	
CE 567 Wind and Seismic Loads	
CE 690 Special Topics in (Area) ¹	
CECM 669 Advanced Project Management	
CECM 671 Construction Liability & Contracts	

¹ Must be approved by certificate program director prior to registration

Certificate in Structural Engineering

Requirements	Hours
Prerequisite Course	
CE 360 Structural Analysis (or equivalent)	
Select 15 credits from the following:	15
CE 516 Mechanical Vibrations	
CE 520 Advanced Mechanics	
CE 526 Foundation Engineering	
CE 553 Design of Wood Structures	
CE 556 Prestressed Concrete Design	
CE 561 Introduction to the Finite Element Method	
CE 562 Advanced Structural Analysis	
CE 564 Structural Dynamics	
CE 567 Wind and Seismic Loads	
CE 568 Bridge Engineering	
CE 650 Advanced Structural Steel	
CE 655 Advanced Reinforced Concrete	
CESE 653 Wood and Masonry Design	
CESE 656 Advanced Mechanics of Materials for Structural Engineering	
CESE 659 Advanced Reinforced Concrete	
CESE 660 Prestressed Concrete Behavior and Design	
CESE 662 Advanced Structural Analysis	
CESE 664 Bridge Engineering	
CESE 665 Structural Dynamics and Earthquake Engineering	
CESE 676 Design of Structural Steel Connections	
CESC 602 Introduction to Sustainable Smart Cities ¹	
CESC 608 Green Infrastructure and Transportation ¹	
CESC 614 Smart Cities Technologies ¹	

¹ Only one of these courses can be applied to this certificate

Certificate in Sustainable Engineering Management

Requirements	Hours
Prerequisite Course	
CE 497 Construction Engineering Management (or equivalent)	
Select 15 credits from the following:	15
CE 600 Sustainable Construction	
CE 608 Green Building Design	
CESC 600 Principles of Sustainable Development	
CESC 602 Introduction to Sustainable Smart Cities	
CESC 608 Green Infrastructure and Transportation	
CESC 610 Health and Livability	
CESC 614 Smart Cities Technologies	
CESC 616 Big Data and Smart Cities	

Certificate in Transportation Engineering

Requirements	Hours
Prerequisite Course	
CE 345 Transportation Engineering (or equivalent)	
Select 15 credits from the following:	15

CE 543	Pavement Design & Construction
CE 622	Traffic Flow Theory
CE 623	Non-Motorized Transportation Design and Planning
CE 624	Simulation Models for Transportation Applications
CE 625	Intelligent Transportation Systems
CE 646	Traffic Engineering Operations
CE 648	Urban and Transportation Planning
CE 690	Special Topics in (Area) ¹
CECM 669	Advanced Project Management ²
CECM 671	Construction Liability & Contracts ²
CESC 600	Principles of Sustainable Development ²
CESC 602	Introduction to Sustainable Smart Cities ²
CESC 608	Green Infrastructure and Transportation ²

¹ Must be approved by certificate program director prior to registration

² Only one of these courses can be applied to this certificate

The following three concentrations in the online Master in Engineering program are offered through the Department of Civil, Construction, and Environmental Engineering:

- Construction Engineering Management
- Sustainable Smart Cities
- Structural Engineering

Sustainable Smart Cities Concentration

Please Note: All Master of Engineering concentrations are 100% online. There are no on-campus classes or required on-campus meetings or activities. Course delivery includes asynchronous and synchronous learning modes. Proper computer equipment and high-speed internet direct access are required to be successful.

Degree Offered	Master of Engineering
Website	http://www.uab.edu/engineering/smartcities
Director	Jason T. Kirby, PhD
E-mail	jt Kirby@uab.edu
Phone	205-934-8479
Address	UAB School of Engineering, HOEN 340 1720 2nd Avenue South, Birmingham, AL 35294-4440

Admission Requirements

In addition to the Graduate School admission requirements, requirements for admission to the UAB MEng-SSC program includes the following:

- Bachelor's degree (any discipline) from a regionally accredited US college or university. SSC promotes a multi-discipline learning experience and therefore an engineering undergraduate degree is not required;
- An undergraduate GPA of 3.0 or higher (individuals not meeting this requirement but who have a strong professional background, references, and interview may be admitted);
- No GRE required
- International applicants must submit English proficiency scores in accordance with UAB Graduate School requirement. Click here for details;

- Original transcripts sent directly to the UAB Graduate School per their policy for degree-seeking students (detailed instructions are included during the online application process);
- Personal interview with the Director of SSC (schedule the interview prior to submitting an application);
- Three letters of recommendation from professional contacts;
- Personal essay detailing academic motivation and career aspirations in SSC; and
- Résumé/Curriculum Vitae

Application Submission Deadline for Fall: August 1; Spring: December 1;
Entry Term(s) Summer: May 1

Deadline for All Application Materials to be in the Graduate School Office Seven business days before term begins (see UAB academic calendar - <https://www.uab.edu/students/academics/academic-calendar>)

Requirements		Hours
CESE 600	Principles of Sustainable Development	3
CESE 602	Introduction to Sustainable Smart Cities	3
CESE 604	Low-Carbon and Renewable Energy Systems for Smart Cities	3
CESE 606	Managing Natural Resources and Sustainable Smart Cities	3
CESE 608	Green Infrastructure and Transportation	3
CESE 610	Health and Livability	3
CESE 612	Green Buildings	3
CESE 614	Smart Cities Technologies	3
CESE 616	Big Data and Smart Cities	3
CESE 618	Research Methods and Project Planning	3
Total Hours		30

Curriculum

Requirements	Hours
Students must complete a minimum of 30 hours with the classes listed below	30
All CESE courses at the 600 level	
All CECM courses with advisor-approval 600-791 (maximum of 9 hours)	
All CE courses with advisor-approval 500-791 (maximum of 12 hours)	
Total Hours	30

Structural Engineering Concentration

Please Note: All Master of Engineering concentrations are 100% online. There are no on-campus classes or required on-campus meetings or activities. Course delivery includes asynchronous and synchronous learning modes. Proper computer equipment and high-speed internet direct access are required to be successful.

The Master of Engineering with a concentration in Structural Engineering is designed to increase the technical knowledge of engineering professionals working in or desiring to work in the broad field of structural engineering.

Admission Requirements

In addition to the Graduate School admission requirements, requirements for admission to the UAB MEng-STR concentration include the following:

- An undergraduate degree in civil or mechanical engineering from an ABET accredited program. Applicants who have a Bachelor's degree and an outstanding academic record from an ABET accredited program other than civil or mechanical engineering or from an unaccredited engineering or applied science program may be admitted at program discretion;
- An undergraduate GPA of 3.0 or higher (individuals not meeting this requirement but who have a strong professional background, references, and interview may be admitted at program discretion);
- No GRE required;
- International applicants must submit English proficiency scores in accordance with UAB Graduate School requirement. Click here for details;
- Original transcripts from all colleges and universities attended since high school must be sent directly to the UAB Graduate School (detailed instructions are included during the online application process);
- Minimum undergraduate prerequisites or equivalent (students missing undergraduate prerequisites may be admitted but will be restricted from taking certain courses until the needed prerequisites are satisfied:
 - Structural Analysis of Elastic Structures
 - Reinforced Concrete Design
 - Principles of Steel Design
- Personal interview with the program director (schedule the interview prior to submitting an application);
- Three letters of recommendation from professional or academic contacts;
- Personal essay detailing academic motivation and career aspirations for earning the degree; and
- Résumé/Curriculum Vitae

To apply: Visit the [UAB Graduate School website](#) and click the 'Apply Now' button. Choose [MEng - Structural Engineering](#) in the Program Applying To section.

Application and Program Deadlines

Entry Term	Deadline
Fall	August 1
Spring	December 1
Summer	May 1
Deadline for All Application Materials to be in the Graduate School Office	Seven business days before term begins (see UAB Academic Calendar - https://www.uab.edu/students/academic-calendar)

Address	UAB School of Engineering, HOEN 130B 1720 2nd Avenue South, Birmingham, AL 35294-4440

The Master of Engineering in Construction Engineering Management (MEng-CEM) is designed to enhance the construction engineering management and business qualifications of working professionals interested in project and company/corporate management.

Admission Requirements

In addition to the Graduate School admission requirements, admission to the program includes the following:

- Bachelor's degree** (any discipline) from a regionally accredited US college or university. CEM promotes a multi-discipline learning experience and therefore an engineering undergraduate degree is not required;
- An **undergraduate GPA** of 3.0 or higher (individuals not meeting this requirement but who have a strong professional background, references, and interview may be admitted);
- No GRE required**;
- International applicants must submit **English proficiency scores** in accordance with UAB Graduate School requirement. [Click here for details](#);
- Original transcripts** sent directly to the UAB Graduate School per their policy for degree-seeking students (detailed instructions are included during the online application process);
- Two years of **relevant construction industry work experience** or a bachelor's degree in engineering or a science-related field;
- Personal interview** with the Director of CEM Student Affairs (schedule the interview prior to submitting a application);
- Three **letters of recommendation** from professional contacts;
- Personal essay** detailing motivation and career aspirations for earning the degree; and
- Résumé/Curriculum Vitae**

To apply: Visit the [UAB Graduate School website](#) and click the 'Apply Now' button.

Deadline for Entry Term(s)	Fall: August 1; Spring: December 1; Summer: May 1
Deadline for All Application Materials to be in the Graduate School Office	Seven business days before term begins (see https://www.uab.edu/students/academics/academic-calendar)

Requirements	Hours
CECM 669 Advanced Project Management	3
CECM 670 Construction Estimating and Bidding	3
CECM 671 Construction Liability & Contracts	3
CECM 672 Construction Methods and Equipment	3
CECM 673 Project Planning and Control	3
CECM 674 Green Building Design/Construction	3
CECM 675 Advanced Construction and Engineering Economics	3
CECM 676 Construction Project Risk Management	3
CECM 688 Construction Management and Leadership Challenges in the Global Environment	3
CECM 689 Building Information Modeling (BIM) Techniques	3
Total Hours	30

Admission Requirements

In addition to the UAB Graduate School admission requirements, admission to the Master's of Science in Civil Engineering degree include the following five criteria:

- An undergraduate engineering degree from an ABET accredited engineering program or applied science program. Applicants who have an outstanding academic record in an unaccredited engineering or applied science degree program may be admitted at program discretion. Students admitted from this category may be required to complete a sequence of undergraduate courses in addition to the normal requirements of the MSCE degree. This set of extra requirements will be specified in writing at the time of admission to the program.
- GPA of 3.0 or better on a 4.0 scale in all undergraduate degree major courses attempted;
- Three letters of recommendation concerning the applicant's previous academic and professional work;
- Original transcripts from all colleges and universities attended since high school must be sent directly to the UAB Graduate School (detailed instructions are included during the online application process)
- International applicants must submit English proficiency scores in accordance with UAB Graduate School requirement. [Click here for details](#)
- Verification of registration by examination as a Professional Engineer (PE) will satisfy criteria 4 above.

Program Requirements

The following minimum requirements apply to the plan of study for a student who has earned a baccalaureate degree in civil engineering. A student with an undergraduate degree in another field may also be accepted into the civil engineering program but will normally have to take

additional preparatory coursework as part of an expanded plan of study. Continuous enrollment for at least 3 credit hours per term is required. Students receiving a research assistantship are required to be enrolled as full-time students. A full-time student is one who is enrolled in at least 9 credit hours per semester.

Special Topics (590/690/790) courses and Independent Study (591/691/791) courses are reviewed for degree applicability for each program in the School of Engineering. No more than 6 combined credit hours of Special Topics and/or Independent Study courses will be applied to the MSCE degree without appeal to and approval from the Program Director.

The School of Engineering offers similar courses at the 400/500 and 600/700 levels. While the higher numbered course has more advanced content, there is a significant overlap in topics. Therefore, students are not allowed to take a 500-level or 700-level course for credit if they have previously taken the related 400-level or 600 level course, respectively.

Master of Science in Civil Engineering

Plan I (Thesis Option)

When a Plan I student successfully completes required coursework, the student should apply to enter candidacy. Once a master's candidate, the student must complete a minimum of 9 credit hours of thesis research (CE 699) over the course of at least two semesters. Prior to admission of candidacy, the student can take research credit hours in the form of non-thesis research (CE 698). These non-thesis research credit hours cannot be converted from non-thesis research credits into thesis research credits.

- The student must successfully complete at least 33 credit hours of graduate credit, including:
 - A minimum of 18 credit hours in civil engineering,
 - Up to 6 credit hours in disciplines outside civil engineering, such as other engineering disciplines, mathematics, chemistry, computer science, earth science, physics, urban affairs, public administration, or public health, and
 - A minimum of 9 credit hours of CE 699 Thesis Research under the direction of the graduate study committee chair resulting in a successful oral defense and committee approved thesis.
- All Plan I Master's students are required to complete online modules covering the 9 topic areas of [Responsible Conduct of Research](https://www.citiprogram.org) (RCR) research integrity. The modules can be accessed online at <https://www.citiprogram.org>.

Plan II (Non-Thesis Option):

The student must successfully complete at least 33 credit hours of graduate credit including:

- A minimum of 24 credit hours in civil engineering,
- Up to 6 credit hours in disciplines outside civil engineering, such as other engineering disciplines, mathematics, chemistry, computer science, earth science, physics, urban affairs, public administration, or public health, and
- A minimum of 3 credit hours of CE 698 Non-Thesis Research under the direction of the graduate study committee chair resulting in a successful oral defense and committee approved written report.

Areas of Specialization

The department offers specialization programs in the fields of construction engineering management, environmental engineering, structural engineering/structural mechanics, and transportation engineering. Supporting courses are offered in geotechnical engineering, optimization, engineering law, and other areas. If a student chooses to declare a concentration, the student must choose from the courses listed below the appropriate concentration to fulfill the required 18 credit hours (Plan I) or 24 credit hours (Plan II) within civil engineering.

Concentration in Construction Engineering Management

Requirements	Hours
Select 18 credits hours for Plan I or 24 credit hours for Plan II from the following: ¹	
CE 515	Building Information Modeling (BIM) ¹
CE 575	Construction Safety and Health Management
CE 597	Construction Engineering Management
CE 600	Sustainable Construction
CE 690	Special Topics in (Area) ²
CE 691	Individual Study in (Area) ²
CECM 669	Advanced Project Management ³
CECM 670	Construction Estimating and Bidding ³
CECM 671	Construction Liability & Contracts ³
CECM 672	Construction Methods and Equipment ³
CECM 673	Project Planning and Control ³
CECM 674	Green Building Design/Construction ³
CECM 675	Advanced Construction and Engineering Economics ³
CECM 676	Construction Project Risk Management ³
CECM 688	Construction Management and Leadership Challenges in the Global Environment ³
CECM 689	Building Information Modeling (BIM) Techniques ^{1, 3}

¹ Only one of these courses can be applied to this degree

² or any CE 590/690 IITS course offerings from UA, USA, or UAH campuses with prior approval of the Program Director. Please note: all special topics and individual study courses must have prior approval of the program director in order to apply to degree or concentration requirements; no more than a combined 6 hours of special topics or individual study can be applied to the degree without prior program director approval

³ MEng courses (i.e., CECM, CESE, and CESC) can be applied toward MSCE degree requirements

Concentration in Environmental Engineering

Requirements	Hours
Select 18 credit hours for Plan I or 24 credit hours for Plan II from the following:	
CE 530	Water Supply/Drainage Design
CE 531	Energy Resources
CE 533	Solid and Hazardous Wastes Management
CE 534	Air Quality Modeling and Monitoring
CE 537	Environmental Experimental Design and Field Sampling
CE 580	Introduction to Water and Wastewater Treatment
CE 585	Engineering Hydrology
CE 590	Special Topics in Civil Engineering ²
CE 600	Sustainable Construction ¹

CE 608	Green Building Design
CE 610	The Engineered Environment
CE 636	Stormwater Pollution Management
CE 640	Wastewater Treatment Engineering
CE 690	Special Topics in (Area) ²
CE 691	Individual Study in (Area) ¹
CESC 600	Principles of Sustainable Development
CESC 602	Introduction to Sustainable Smart Cities ^{2, 3}
CESC 608	Green Infrastructure and Transportation ^{2, 3}

¹ or any CE 590/690 IITS course offerings from UA, USA, or UAH campuses with prior approval of the Program Director. Please note: all special topics and individual study courses must have prior approval of the program director in order to apply to degree or concentration requirements; no more than a combined 6 hours of special topics or individual study can be applied to the degree without prior program director approval

² MEng courses (i.e., CECM, CESC, CESE) can be applied to the MSCE degree requirements

³ Only one of these courses can be applied to this degree

Concentration in Structural Engineering

Requirements **Hours**

Select 18 credit hours for Plan I or 24 credit hours for Plan II from the following:¹

CE 516	Mechanical Vibrations
CE 520	Advanced Mechanics
CE 526	Foundation Engineering
CE 544	Civil Engineering Analysis II
CE 553	Design of Wood Structures
CE 554	Design of Masonry Structures
CE 556	Prestressed Concrete Design
CE 557	Concrete Technology
CE 560	Structural Mechanics
CE 561	Introduction to the Finite Element Method
CE 562	Advanced Structural Analysis
CE 564	Structural Dynamics
CE 568	Bridge Engineering
CE 590	Special Topics in Civil Engineering ¹
CE 612	Theory of Elasticity
CE 617	Theory of Plates and Shells
CE 650	Advanced Structural Steel
CE 655	Advanced Reinforced Concrete
CE 690	Special Topics in (Area) ¹
CE 691	Individual Study in (Area) ¹
CESC 602	Introduction to Sustainable Smart Cities
CESC 608	Green Infrastructure and Transportation
CESC 614	Smart Cities Technologies

¹ or any CE 590/690 IITS course offerings from UA, USA, or UAH campuses with prior approval of the Program Director. Please note: all special topics and individual study courses must have prior approval of the program director in order to apply to degree or concentration requirements; no more than a combined 6 hours of special topics or individual study can be applied to the degree without prior program director approval

² MEng courses (i.e., CECM, CESC, CESE) can be applied to MSCE degree requirements

Concentration in Transportation Engineering

Requirements **Hours**

Select 18 credit hours for Plan I or 24 credit hours for Plan II from the following:¹

CE 543	Pavement Design & Construction
CE 590	Special Topics in Civil Engineering ²
CE 621	Transportation Engineering Seminar ¹
CE 622	Traffic Flow Theory
CE 624	Simulation Models for Transportation Applications
CE 625	Intelligent Transportation Systems
CE 646	Traffic Engineering Operations
CE 648	Urban and Transportation Planning
CE 690	Special Topics in (Area) ²
CE 691	Individual Study in (Area) ¹

¹ or any CE 590/690 IITS course offerings from UA, USA, or UAH campuses with prior approval of the Program Director. Please note: all special topics and individual study courses must have prior approval of the program director in order to apply to degree or concentration requirements; no more than a combined 6 hours of special topics or individual study can be applied to the degree without prior program director approval

The Department offers a variety of courses due to the focus areas under the Master of Science in Civil Engineering, which makes it difficult to designate all the courses in which students may enroll. Therefore, the lists above are not all-inclusive.

Admission Requirements

The coordinated Environmental Engineering/Public Health degree program is offered through the UAB School of Engineering (SOE) and UAB School of Public Health (SOPH). Earning these two advanced degrees prepares students for a broad range of careers in urban planning, urban sustainability, healthy and livable city design, the management of air, water, and land resources, and creating healthy communities. Students in this coordinated program earn a Master of Public Health (M.P.H.) with a concentration in Population Health. In this concentration, students gain a solid foundation in public health through completion of the M.P.H. core (based on the Evidence-based Public Health framework), an Applied Practice Experience (Internship), and an Integrative Learning Experience (Capstone). Students also complete environmental health sciences courses focusing on urban health issues including air and water pollution, occupational safety, and assessing and managing environmental risks. In addition, in this coordinated degree program students earn a Master of Science in Civil Engineering (MSCE) with a specialization in environmental engineering focusing green building and water supply design, drainage and stormwater runoff design, and energy resources. The program offers a broad curriculum covering health aspects of engineering designs, resilient and sustainable urban development, low carbon and renewable energy systems, green infrastructure, natural resource management, health and livability, transportation and mobility, big data analytics, and smart technologies. Graduates of this coordinated degree program will shape our modern cities into human habitats that are safe, clean, and sustainable addressing issues such as the growing stressors of energy security, population growth and health, food supply, waste

disposal, climate change, and future infrastructure demands. This program is aimed at leaders and professionals in public and private sector organizations who seek to design, develop, and deliver smart, healthy and sustainable environmental solutions.

In addition to the UAB Graduate School admission requirements, admission to the dual Master's of Science in Civil Engineering (MSCE)/ Master's of Public Health (MPH) degree include the following five criteria:

1. An undergraduate engineering degree from an ABET accredited engineering program, applied science program, or similar. Applicants who have a degree from an unaccredited program but demonstrate an outstanding academic record may be admitted provisionally at the CCEE Graduate Program Director's discretion. Students admitted from this category may be required to complete a sequence of undergraduate courses in addition to the regular requirements of the MSCE degree. This set of extra requirements will be specified in writing at the time of admission to the program.
2. An undergraduate GPA of 3.0 or higher on a 4.0 scale in all undergraduate degree major courses attempted. Individuals not meeting this requirement but who have a strong professional background and excellent references may be admitted.
3. Three (3) letters of recommendation concerning the applicant's previous academic and professional work.
4. **No GRE required.**
5. International applicants must submit English proficiency scores in accordance with UAB Graduate School requirement. [Click here for details.](#)
6. Verification of registration by examination as a Professional Engineer (PE) will satisfy criterion 2 above.

Master of Science in Civil Engineering/Master of Public Health Program Requirements

The following minimum requirements apply to the plan of study for a student who has earned a baccalaureate degree in civil engineering (BSCE). The MSCE/MPH degree plan contains 42-44 MPH credit hours meeting the Council on Education for Public Health (CEPH) MPH requirements and include PUH 610 Population Health meeting the SOPH requirement for the MPH in Population Health. 2) The MSCE/MPH degree plan contains 33 MSCE credit hours meeting the SOE MSCE requirements and have at least 30 credit hours unique to each Master's degree satisfying the UAB Graduate School requirements.

A student with an undergraduate degree in another field may also be accepted into the civil engineering program but will normally have to take additional preparatory coursework as part of an expanded plan of study. Continuous enrollment for at least 3 credit hours per semester is required. Students receiving a research assistantship are required to be enrolled as full-time students. A full-time student is one who is enrolled in at least 9 credit hours per semester.

Special Topics (590/690/790) courses and Independent Study (591/691/791) courses are reviewed for degree applicability for each program in the School of Engineering. No more than 6 combined credit hours of Special Topics and/or Independent Study courses will be applied to the MSCE degree without appeal to and approval from the Program Director.

The SOE offers similar courses at the 400/500 and 600/700 levels. While the higher numbered course has more advanced content, there is a significant overlap in topics. Therefore, students are not allowed to take a

500-level or 700-level course for credit if they have previously taken the related 400-level or 600 level course, respectively.

When the graduate student successfully completes required coursework, the student opted for Plan I (Thesis Option) should apply to enter candidacy. Once a master's candidate, the student must complete a minimum of 9 credit hours of thesis research (CE 699) over the course of at least two semesters. Prior to admission of candidacy, the student can take research credit hours in the form of non-thesis research credit hours (CE 698). These non-thesis research credit hours cannot be converted from non-thesis research credits into thesis research credits.

CE 530 Water Supply/Drainage Design	
CE 608 Green Building Design	
Total Hours Earned for MPH Degree ³	
Remaining MSCE Program Requirements	18
CE 531 Energy Resources	
CE 537 Environmental Experimental Design and Field Sampling	
CE 731 Environmental Law	
CE 699 Thesis Research ^{5, 6}	
Total Unique MSCE Hours: 30 ²	
MSCE Shared Hours from MPH Curriculum	
ENH 612 Assessing & Managing Environmental Risks	
Total Hours Earned for MSCE Degree ⁷	
Total Hours Completed for MSCE/MPH Degree ⁸	

¹ Students may substitute ENH courses to meet their educational objectives with consent of advisor (7 credit hours minimum required)

² Meets UAB Graduate School requirements of a minimum 30 hours of graduate work

³ Meets the CEPH MPH requirements of a minimum of 42 semester hours

- ⁴ Course substitutions may be made with consent of advisor
⁵ EHS faculty will serve on thesis committee
⁶ For Thesis students; Non-Thesis students will register for a total of 6 credit hours of CE electives and 3 credit hours of CE 698 Non-Thesis Research
⁷ Master of Science in Engineering
⁸ Assumes the recommended Environmental Health Sciences courses plus PUH 610 Population Health (12 credit hours)

Admission Requirements

In addition to the UAB Graduate School admission requirements, requirements for admission to the program leading to the Doctorate of Philosophy in Civil Engineering degree include the following five criteria:

1. An **undergraduate engineering degree** from an ABET accredited program **or a master's degree in engineering**. Applicants who do not meet this criterion but who have an outstanding academic record in an engineering degree program not accredited by ABET, or in a baccalaureate or master's degree program in a related field, may be admitted on probation. Students admitted in this category will be required to complete a sequence of undergraduate or graduate courses in addition to the regular requirements of the MSCE degree. This set of extra requirements will be specified in writing at the time of admission to the program;
2. An **undergraduate GPA** of 3.0 or higher on a scale of 4.0 in all undergraduate degree major courses attempted. Individuals not meeting this requirement but who have a strong professional background and excellent references may be admitted;
3. Three (3) **letters of recommendation** concerning the applicant's previous academic and professional work;
4. No GRE required
5. International applicants must submit **English proficiency scores** in accordance with UAB Graduate School requirement. [Click here for details.](#)
6. Verification of registration by examination as a Professional Engineer (PE) will satisfy criterion 2.

Doctor of Philosophy in Civil Engineering Program Requirements

This is a joint program with the University of Alabama in Huntsville (UAH). A typical student entering the program will already have an undergraduate degree in Civil Engineering from a program accredited by the Engineering Accreditation Commission of ABET. Students with outstanding records in related fields or from a non-accredited engineering program will be considered for admission with contingencies and must remedy deficiencies in their preparation after the start of their academic program. These requirements will be defined in writing at the time of admission.

The program requires 51 credit hours of coursework beyond the baccalaureate level or 27 credit hours of coursework beyond the master's degree, plus a minimum of 24 credit hours of dissertation research (CE 799 Dissertation Research).

A minimum of 6 credit hours must be taken from the UAH campus. The student has two options

1. Register at UAH and then have the credits transferred to UAB or
2. Register at UAB for an equivalent course and have the UAH instructor send the grade to UAB.

The courses may be taken through the Intercampus Interactive Telecommunications System (IITS) at UAB, Distance Learning (DL), or web-based instruction for UAH.

Special Topics (690/790) courses and Individual Study (691/791) courses are reviewed for degree applicability for each program in the School of Engineering. No more than 6 combined credit hours of Special Topics and/or Independent Study courses will be applied to the degree without appeal to and prior approval from the Program Director.

The School of Engineering offers similar courses at the 400/500 and 600/700 levels. While the higher numbered course has more advanced content, there is a significant overlap in topics. Therefore, students are not allowed to take a 500-level or 700-level course for credit if they have previously taken the related 400-level or 600 level course, respectively.

Doctoral students are also required to successfully complete GRD 717 Principles of Scientific Integrity prior to admission to candidacy.

A Graduate Study Committee must be established by the doctoral student and must include a minimum of five graduate faculty members, at least one of which must be from UAH. A comprehensive examination is required of all doctoral candidates. This examination is conducted by the Graduate Study Committee after all coursework is successfully completed. The examination has both written and oral components. During the oral portion of the examination, the student also presents the dissertation proposal to the Graduate Study Committee. The comprehensive examination may only be taken twice.

When the graduate student successfully passes the comprehensive examination, including the dissertation proposal, the student should apply to enter candidacy. Once a doctoral candidate, the student must complete a minimum of 24 credit hours of dissertation research (CE 799 Dissertation Research) over the course of at least two semesters. Prior to admission to candidacy, the student can complete research hours in the form of non-dissertation hours (CE 798). A maximum of 12 CE 798 Non-Dissertation Research hours can be applied to the Dissertation Research (CE 799) requirement.

After successful completion of a minimum of 24 credit hours of dissertation research, the graduate student must complete the dissertation and submit to the Graduate Study Committee for review. The doctoral candidate must also present an oral public defense of the dissertation. When the graduate student successfully defends the dissertation, the student then has ten working days to complete revisions and submit the approved document to the Graduate School.

Required coursework must be selected from the list below. PhD students are encouraged to take the highest level available (700 level rather than 600 level; 600 or 700 level rather than 500 level). Students are only allowed to take 500 level courses if there is no equivalent 600 or 700 level course available. A minimum of 50 percent of the required coursework must be at the graduate level of 600 or above.

Additional graduate courses can be counted towards the PhD degree, as long as those courses were taken above and beyond the requirements for a BS or MS degree. To do so requires that the student must petition the department to have those courses counted toward an advanced degree. The graduate program director would make a recommendation on the petition (and would consider the UAB equivalent course description if the course was taken from another university). The maximum credit hours from an outside institution that could be applied toward an advanced degree at UAB is 12 credit hours.

¹ Minimum 24 hours of dissertation research taken over the course of at least two semesters following admission to candidacy

² MEng courses (i.e., CECM, CESC, CESE) can be applied toward PhD degree requirements

³ Only one of these courses can be applied to the degree

⁴ Or any CE 690/790 IITS course offerings from UAH, USA, and/or UA campuses with prior approval of Program Director

⁵ Only one of these courses can be applied to the degree

Admission Requirements

The coordinated Public Health/Civil Engineering degree program is offered through the UAB School of Engineering (SOE) and the School of Public Health (SOPH). Earning these two advanced degrees provides students with a foundation for positions in research, government, as well as private industry. Students in this coordinated program earn a Doctor of Philosophy in Civil Engineering (PhD). The PhD program is intended for students who have achieved high levels of scholarship and are capable of conducting independent and original research. PhD students in civil engineering will work closely with faculty in the

Department of Civil, Construction and Environmental Engineering, but they may also work on interdisciplinary teams with faculty from other UAB departments as well as outside industry. The program offers a broad curriculum covering engineering designs, resilient and sustainable urban development, low carbon and renewable energy systems, green infrastructure, natural resource management, health and livability, transport and mobility, big data analytics, and smart technologies. In addition to the PhD, students earn a Master of Public Health (MPH) with a concentration in Population Health. In this concentration, students gain a solid foundation in public health through completion of the MPH core (based on the Evidence-based Public Health framework), an Applied Practice Experience (Internship), and an Integrative Learning Experience (Capstone). Students also complete environmental health sciences courses focusing on urban health issues including air and water pollution, occupational safety, and assessing and managing environmental risks. Graduates of this coordinated degree program will conduct research in and create solutions for human habitats that are safe, clean, and sustainable addressing issues such as the growing stressors of energy security, population growth and health, food supply, waste disposal, climate change, and future infrastructure demands.

In addition to the UAB Graduate School admission requirements, requirements for admission to the program leading to the Doctor of Philosophy in Civil Engineering degree include the following five criteria:

1. An undergraduate engineering degree from an ABET accredited program or a master's degree in engineering. Applicants who do not meet this criterion but who have an outstanding academic record in an engineering degree program not accredited by ABET, or in a baccalaureate or master's degree program in a related field, may be admitted on probation. Students admitted in this category will be required to complete a sequence of undergraduate or graduate courses in addition to the regular requirements of the MSCE degree. This set of extra requirements will be specified in writing at the time of admission to the program.
2. An undergraduate GPA of 3.0 or higher on a 4.0 scale in all undergraduate degree major courses attempted. Individuals not meeting this requirement but who have a strong professional background and excellent references may be admitted.;
3. Three (3) letters of evaluation concerning the applicant's previous academic and professional work; and
4. **No GRE required.**
5. International students are required to have a bachelor's or master's degree in engineering or a science related field and must submit TOEFL, IELTS, PTEA, IELA, or Duolingo scores. (<https://www.uab.edu/graduate/admissions/international-applicants#english-proficiency-exams>). Duolingo scores are preferred by the UAB Graduate School.
6. Verification of registration by examination as a Professional Engineer (P.E.) will satisfy criterion 2 above.

Doctor of Philosophy in Civil Engineering and Master of Public Health with a concentration in Population Health

Two curricula have been developed for this coordinated program, one for students entering with a Master's of Science in Civil Engineering (MSCE) or closely related field and another for students entering without

an MSCE, most likely with on a baccalaureate degree in Civil Engineering or closely-related field. The curriculum planning grid and a breakdown of coursework by degree program is attached for both options are attached. For students entering with an MSCE degree, a total of 81-83 credit hours of coursework are required for the coordinated PhD/MPH Normally, 42-44 credit hours are required for the MPH; however, because of the coordinated nature of the degree 12 credit hours from the PhD curriculum are credited to the MPH This allows students to earn both degrees in reduced time and at reduced cost. The PhD program 27 credit hours of coursework beyond the master's degree, plus a minimum of 24 credit hours of dissertation research. For students entering without an MSCE degree, a total of 90-92 credit hours of coursework are required for the coordinated PhD/MPH Normally, 42-44 credit hours are required for the MPH; however, because of the coordinated nature of the degree 12 credit hours from the PhD curriculum are credited to the MPH Twelve credit hours from the MPH degree are used to meet PhD program requirements. This allows students to earn both degrees in reduced time and at reduced cost. The PhD program requires 48 credit hours of coursework beyond the master's degree, plus a minimum of 24 credit hours of dissertation research. Students may complete the MPH portion of this coordinated degree program totally online, in class or through a mix of online and in-class experiences. Online students pay less than the out-of-state tuition rate for the MPH portion of this coordinated degree.
