Sociology is the scientific study of human social behavior, from the smallest group interactions to the broadest and most complex social processes. As a social science, the discipline analyzes the patterns of behavior in all types of social relationships. This field has broad scope and relevance and can be crafted to best serve a student's career or post-degree education.

The Department of Sociology offers three majors in sociology: Bachelor of Arts degrees in 1) General Sociology, 2) Social Psychology Concentration in Sociology, and a Bachelor of Science degree in 3) Medical Sociology. Minors are offered in General Sociology, Medical Sociology, and Social Psychology.

The undergraduate program in general sociology is designed to complement UAB's location in a large metropolitan area. Such a location provides an excellent laboratory for study in various areas, including social inequality and urban sociology, as well as, medical sociology and social psychology. Students may choose from several courses in each of these areas to best compliment their career goals. The general sociology major provides a broad background for students who are not planning a career in sociology but who want an understanding of the nature and development of social structures and social issues-knowledge that can be applied to a variety of occupations and careers. Additionally, the general sociology degree serves as useful pre-professional training for careers such as law, business, education, and government. Finally, the program helps prepare students for graduate study in sociology and other social sciences.

The social psychology concentration provides a perspective on interpersonal relationships that draws on research conducted in sociology and psychology. In the broadest sense, social psychology is the study of how people’s behaviors and thoughts influence, and are influenced by, the actions of others. As a field of study, social psychology has typically focused on the study of persons in face-to-face situations and small group settings. The social psychology concentration prepares students for careers in service-oriented fields such as health professions, education, business, and government, and graduate work in social psychology.

Medical sociology provides an analytic framework for understanding the social contexts of health, illness, and health care. The Bachelor of Science degree in Medical Sociology is a research-focused degree that prepares students for graduate studies in medical sociology or a career in health-related services, medical (social) research, or government data analysis. In addition, when the Bachelor of Science in Medical Sociology is paired with pre-professional medical programs, students are provided with additional rigor in the social dynamics of the careers of their choice (nursing, medical school, and the health professions).

Honors Program in Sociology  
Purpose  
The Sociology Honors Program is designed to help prepare outstanding undergraduate majors for graduate study in sociology or a career in medical sociology. The program offers a mentored research experience, and under faculty supervision, students will be exposed to a wide range of sociological perspectives and research areas.

Eligibility  
Acceptance into the Sociology Honors Program requires the following:

• Completion of the required sociology courses including Introduction to Sociology, Theory, Research Methods and Statistics (by the end of the fall term of the year the student enters the honor’s program).
• An undergraduate cumulative GPA of 3.00 or above.
• A junior or senior level standing (admittance to Honors Program must take place before August 1).
• A cumulative GPA in Sociology courses of 3.3 or above.

Requirements  
The following is required to graduate with honors in the Sociology Honors Program:

• Completion of the required sociology courses.
• Completion of two-semester Honors seminar 498/499.
• Completion of a senior-level thesis or Service Learning Project or Research Project under faculty supervision.

Benefits  
Participation in the Sociology Honors Program provides a unique opportunity for highly motivated, academically talented undergraduate students to have access to and interact with faculty in an environment that encourages creativity and independent scholarship. Seminar participation and research experience will be important to nurturing the student’s sociological imagination. Completion of the Honors Program is an advantage when applying to graduate school or looking for employment in an appropriate discipline-oriented field. Finally, students who complete the program will graduate “With Honors in Sociology.”
