UAB Sustainability

UAB Sustainability understands that our future belongs to the present. We focus on sustainability and the triple bottom line theory to empower our leaders to make data-driven decisions. We partner across our institution to ensure the decisions we make now will have a positive impact on the quality of life of the UAB community for generations to come.

UAB has a special responsibility to act as a driver of sustainable solutions in our region and beyond. Our urban campus is a living laboratory, because of its:

• more than 200 classroom, office, research, and hospital buildings,
• space occupying more than 100 city blocks,
• role as one of the top employers in the region,
• role as the largest electricity user in the state, and
• responsibility as the single-biggest contributor to Birmingham’s economy
