

Health Behavior

Degrees Offered:	M.P.H., Ph.D.
Department Chair:	Suzanne E. Judd, PhD
Phone:	(205) 934-6020
Department Contact:	Julie Brown, MS, MBA
Department Contact E-mail:	jebrown@uab.edu
Website:	www.uab.edu/soph/home/health-behavior

Overview

The Department of Health Behavior aims to train social and behavioral scientists to conduct research, develop, and evaluate, implement and disseminate lifestyle modification programs, as well as to integrate ethical, cultural and social justice topics to promote the public's health.

Health Behavior MPH and PhD students learn to use theories and methods from the social and behavioral sciences to develop programs that encourage and promote healthy behaviors. They learn state-of-the-art techniques and methods for research and program evaluation. Doctoral students study these topics in depth as they apply their knowledge and skills in conducting research, writing grant applications, analyzing data, and presenting, publishing, and translating findings. Our research activities focus primarily on obesity and weight management, family and child and adolescent health issues, health disparities, homelessness, sexual health risks including HIV/AIDS prevention and treatment, community-based health promotion, health communication, LGBTQ health and well-being, healthy aging, and dissemination and implementation science.

Degree Programs

- Master of Public Health (MPH) concentration in Health Behavior (Including the Fast Track Program, Accelerated Bachelors/Masters (ABM) and Online Degree Program)
- Doctor of Philosophy (PhD) in Health Behavior

Admissions Information

Master Program Deadline:	www.uab.edu/soph/home/apply/graduate#step1
PhD Program Deadline:	www.uab.edu/soph/home/apply/graduate#step1
GPA	3.0
Number of Letters of Recommendation Required:	Two
Entrance Tests: GRE	Not required
TOEFL	TOEFL is required for international applicants whose native language is not English.
Comments	For additional information please contact Julie Brown, MS, MBA (jebrown@uab.edu , phone: 205-975-8075)

UAB has many degree programs (both face-to-face and online) that can lead to professional licensure or certification. Licensure requirements vary from state to state and by professional organization. Federal Regulations require UAB to provide public or general disclosures on educational programs designed to meet educational requirements for a specific professional license or certification, that is required for employment in an occupation, or is advertised as meeting such requirements. For a list of programs that customarily lead to professional licensure or certification, please visit the [UAB Professional Licensure and Certification](#) webpage.

Master of Public Health with a Concentration in Health Behavior

Including the Fast-Track and Accelerated Bachelors/Masters (ABM), and Online Degree Program

The MPH degree in Health Behavior addresses the behavioral, social, and cultural factors related to individual and population health and health disparities. Students in our program will apply social and behavioral science theories to public health problems, develop evidence-based health promotion interventions and disease prevention programs, and apply principles of evaluating health promotion interventions and disease prevention programs. We emphasize the importance of community based participatory research and applying findings through a variety of behavioral and social science health promotion strategies. Classes are engaging, interactive, and relevant to current health behavior issues.

Graduates of our health behavior program are well positioned for opportunities in local, state, and federal agencies, non-profit/community-based organizations, private research foundations, and the academic setting.

Curriculum

Students in this track must complete 44 credit hours. This includes the MPH core, SOPH requirements, departmental track requirements, electives and internship. Full-time students generally complete this degree in 2 years or less (4-5 semesters). Part-time students may take up to 5 years.

Requirements	Hours
MPH Core Requirements: (14 hours)	
PUH 601 This is Public Health	3
PUH 602 Community Assessment	3
PUH 603 Quantitative Methods in Public Health	3
PUH 604 Programs and Policies	3
PUH 607 Public Health Professional Passport	1
ENH 690 Environmental Health Perspectives	1
Concentration Requirements: (16 hours)	
HB 600 Social and Behavioral Sciences in Public Health	3
HB 624 Advanced Social and Behavioral Science Theory	3
HB 636 Developing Interventions to Promote Public Health	3
HB 641 Research Methods in Behavioral Science	3
HB 643 Health Program Evaluation	3
HB 696 Scholar to Career: Essential Skills to Success	1
Applied Practice Experience: (3 hours)	
PUH 688 Public Health Internship	3
Approved Electives: (9 hours)	
Select 9 hours of 600-level or higher (HB) courses.	9

Integrative Learning Experience: (3 hours)		
HB 689	Health Behavior Integrative Learning Experience	2
Total Credit Hours:		44

Doctor of Philosophy in Health Behavior

The [PhD in Health Behavior](#) at the University of Alabama at Birmingham offers an enriching and engaging doctoral curriculum in health behavior combined with world-class research opportunities across Alabama, the United States, and the world. Students are trained to become health behavior scientists in academia, government, industry, and other organizations. Students are equipped to use theories and methods from the social and behavioral sciences to increase the understanding of the determinants of human health behaviors and translate that knowledge into programs, interventions, and policies that encourage healthy behaviors and improve the public's health. Doctoral students learn state-of-the-art techniques and methods to conduct research and program evaluation that can be applied to a variety of employment opportunities located locally, nationally, and globally in many different sectors.

Curriculum

The PhD program requires completion of a minimum of 72 hours of graduate credit, satisfactory performance on the qualifying exam, and completion of a doctoral dissertation. All PhD students must meet the graduation requirements of their department and the UAB Graduate School.

All students in an MSPH, MS, DrPH, or PhD program are required to complete PUH 600: Overview of Public Health. PUH 600 is a required, free, non-credit course. The course must be completed in a single semester (Fall or Spring); students must complete the course by the end of their second semester in the program. Students who already possess a Bachelor of Public Health (BS) or a Master of Public Health (MPH) degree from an institution that was CEPH-accredited at the time their degree was awarded are exempt from this requirement.

Requirements	Hours	
Departmental Requirements: (24 hours)		
HB 703	Writing for the Behavioral Sciences	3
HB 712	Examining Health Inequities in Social and Behavioral Sciences	3
HB 724	Advanced Social and Behavioral Science Theory	3
HB 736	Advanced Research Intervention Design	3
HB 737	Advanced Intervention Implementation and Evaluation	3
HB 741	Advanced Research Methods in the Behavioral Sciences	3
GRD 717	Principles of Scientific Integrity	3
PUH 703	Public Health Grant Writing	3
Advanced Research & Stats Methods Courses: (12 hours)		
EPI 610	Principles of Epidemiologic Research	3
BST 611	Intermediate Statistical Analysis I	3
BST 612	Intermediate Statistical Analysis II	3
A Qualitative or Mixed Methods Research Course		3
Health Behavior Electives: (minimum 12 hours)		12
Health Behavior Directed Research: (minimum 12)		
HB 798	Doctoral-Level Directed Res	1-9
Health Behavior Dissertation Research: (minimum 12 hours)		

HB 799	Doctoral Dissertation Research	1-9
Minimum Credit Hours Earned		72

Courses

HB 600. Social and Behavioral Sciences in Public Health. 3 Hours.

Social and behavioral science theories and strategies in public health will be discussed in relation to preventing disease and promoting health over the life course. The course is comprised of two major sections: (1) overview of fundamentals of social and behavioral sciences in public health and (2) social and behavioral science research and strategies and application of social and behavioral sciences in public health practice and policy.

HB 601. LGBTQ Research Methods. 3 Hours.

The purpose of this course is to provide focused training in methods relating to LGBTQ health. Students taking the course will be provided research skills to assess and address the factors driving SGM risk and resilience in general, with attention to intersectional identities (e.g., race and ethnicity, age, ability, region, religion, and rurality). In addition to building research skills, the course will include topics such as 'equitable budgetary practices,' enabling students to meaningfully and equitably engage community partners throughout the research cycle.

Prerequisites: HB 607 [Min Grade: C] or HB 707 [Min Grade: C]

HB 602. Alcohol and Drug Abuse. 3 Hours.

History and theory of human substance use and abuse. Empirical foundations of alcohol and drug abuse, diagnosis, assessment, treatment, and prevention. Course will be graded by letter. 3 hours.

HB 603. Obesity Prevention & Intervention. 3 Hours.

The aim of this course is to provide students with theoretical and practical knowledge required to develop, implement, and evaluate obesity intervention and prevention programs. The course covers both pediatric and adult obesity intervention and prevention with a focus on lifestyle (dietary intake, physical activity) and environmental factors. Course will be graded by letter. 3 hours.

HB 604. LGBTQ Health and Wellbeing Service Learning. 3 Hours.

The service-learning course will examine LGBTQ health and wellbeing. Specifically, it will take the knowledge learned from courses associated with the LGBTQ health and wellbeing certificate program and enable the students the opportunities to put it into practice. Students will have a range of opportunities to explore what LGBTQ health and wellbeing looks like in practice. Topics include issues related to LGBTQ risk and resilience, policy and programmatic approaches to LGBTQ health and health and wellbeing, as well as the concrete advocacy and leadership skills needed to address the most pressing inequities faced by LGBTQ communities in Alabama and the Deep South. Service-learning is a high-impact practice that combines community service with structured academic learning, including preparation, and reflection.

Prerequisites: HB 607 [Min Grade: C] or HB 707 [Min Grade: C]

HB 605. Physical Activity in Public Health. 3 Hours.

This seminar course is an introduction to research and practice related to physical activity promotion from a public health perspective and will describe health benefits, epidemiological data, national recommendations and plans, and global initiatives related to physical activity. Course will be graded by letter. 3 hours.

HB 607. Introduction to LGBTQ Health. 3 Hours.

This course will survey current LGBTQ health topics, including: 1) Defining evolving terms and concepts; 2) Risk and resilience - physical, mental, and behavioral health among LGBTQ individuals; 3) Theories guiding LGBTQ research; 4) Analytic considerations when conducting LGBTQ health inequity research; 5) Ways to improve the provision of services for LGBTQ individuals; 6) Overview of key, local, national, and global policies impacting LGBTQ individuals; and 7) Meaningful integration of LGBTQ communities in policy, programs, and research.

HB 609. African-American Health Issues. 3 Hours.

This is an intermediate level course that focuses on: epidemiological data illustrating the health risks experienced by African-Americans; sociocultural factors essential for understanding and enhancing the health of African-Americans; effective health-related prevention programs for African-Americans.

HB 611. Mental Health as a Public Health Issue. 3 Hours.

This course is designed to increase knowledge of mental illness at the individual, community, and population levels. It also covers historical and contemporary models and research on the etiology, diagnosis, assessment, treatment and prevention of mental and other behavioral health disorders.

HB 612. Examining Health Inequities in Social and Behavioral Sciences. 3 Hours.

This course is designed to provide a comprehensive overview of race/ethnic health disparities/health inequities in the U.S. Both historical context and more current perspectives of identified determinants of health will be discussed as contributors to current health inequities.

HB 613. Health Promotion Practices and Disability. 3 Hours.

This course will examine the population of people living with a disability and health promotion approaches at multiple levels (individual, social, environmental, and policy). One in five people in the U.S. has a disability and many people will be affected by disability, whether personally or through a loved one, during their lifetime. Advancements have been offered by the medical model of disability towards disability prevention; however, the addition of functional and social models of disability provide a more complete view of how to enhance the lives of millions of Americans and reduce economic burden.

HB 615. Homelessness, Housing and Health. 3 Hours.

The course will begin with a discussion of the concept of homelessness and housing instability and their impact on health. We will discuss how homelessness is defined and enumerated, pathways into homelessness, and multi-level interventions to prevent and end homelessness. We will also explore a series of special topics focusing on populations that may be particularly vulnerable to homelessness as well as the intersection between homelessness and experience of particular health conditions and outcomes.

HB 616. Psychophysiology and Public Health: The Interface of the Mind/Body Connection. 3 Hours.

Psychophysiology is a branch of neuroscience that analyses the interfaces of mental states and physiological responses, and how they interact to affect one another and subsequently drive behaviors. This course introduces students to basic knowledge about neuroanatomy, learning/cognition, neurological processes, memory, human development, brain disorders, response patterns, and behavior change strategies as they relate to public health issues such as sexual behavior, drug addiction, cigarette smoking/vaping, and obesity. The course will also introduce principles of stress management and neurofeedback techniques. A biopsychosocial framework will be applied to a range of public health domains, using Maslow's Hierarchy of Needs to inform context and priorities for interventions.

Prerequisites: HB 624 [Min Grade: C] or HB 624Q [Min Grade: C]

HB 617. Implementation Science and Disability Health. 3 Hours.

The course provides lectures on implementation science and a deep dive into a premier, national program for people with disability. Implementation science helps researchers to understand how and why a program is effective in order for it to be translated into practice. Students will gain a better understanding of when and how to use implementation science methods through a series of lectures and multiple assignments including a grant proposal. In addition, this course provides experiential learning opportunities in disability health and community engagement.

HB 618. Suicide Prevention. 3 Hours.

This course will explore the science of suicide prevention. Topics will include exploring the science of suicide through the five pillars of public health, including epidemiology, biostatistics, environmental health, health care organization & policy, and health behavior. Students will also become certified in QPR Gatekeeper training and be responsible for the development of a public health communications project.

HB 624. Advanced Social and Behavioral Science Theory. 3 Hours.

The aim of this course is to provide students with a broad understanding of theories of health behavior change with a strong focus on those theories that are most widely used in research and practice. Emphasis will be given to the discussion and elaboration of important theoretical concepts as well as their application in specific health behavior interventions. This class will take an ecological perspective and discuss theories that approach behavior change from various different levels. Basic theories that are covered in this course include individual level models (Health Belief Model, Theory of Planned Behavior, Transtheoretical Model), interpersonal level models (Social Cognitive Theory), and community level models (community organization and other participatory models like Community Based Participatory Research, Diffusion of Innovations). 3 hours.

HB 625. Dissemination and Implementation in Health. 3 Hours.

The course will offer an introduction to dissemination and implementation science, an interdisciplinary field focused on improving the transition of evidence-based health practices, programs, and interventions from research studies into "real-world" settings.

Prerequisites: HB 600 [Min Grade: C]

HB 630. Health Communications: Theory and Practice. 3 Hours.

This course is designed to investigate the role of communication theories and methods in promoting public health and preventing disease. Both theoretical background in communication and behavioral science and practical communication/intervention development methods will be addressed.

HB 636. Developing Interventions to Promote Public Health. 3 Hours.

This course is intended to provide students with a comprehensive understanding of the range and diversity of intervention approaches to behavior change and their application in public health. Emphasis will be placed on developing skills for designing interventions: a) in various public health settings, b) for specific population subgroups, c) based on determinants identified to be most influential and amenable to intervention, and d) within the confines of available resources.

Prerequisites: HB 624 [Min Grade: C] or HB 624Q [Min Grade: C]

HB 639. Survey Design and Analysis in the Social and Behavioral Sciences. 3 Hours.

This course provides an in-depth treatment of survey design and elementary data analysis procedures commonly associated with social and behavioral research. What are the best practices for asking individuals potentially uncomfortable questions about risky health behaviors? How do we measure the reliability and validity of self-reported behaviors? This course addresses these issues in addition to those of sampling hard-to-reach populations, best practices in questionnaire design, an overview of index and scale construction, and an elementary introduction to data entry and analysis of survey data using common software packages.

HB 641. Research Methods in Behavioral Science. 3 Hours.

Review of research methodology in behavioral sciences. Formulation of research questions, causality, experimental and quasi-experimental designs, reliability and validity, reporting findings. Course will be graded by letter.

HB 643. Health Program Evaluation. 3 Hours.

Principles and procedures to evaluate health promotion/disease prevention programs: data collection methods, instrument-scale development, measurement, evaluation designs and analysis of case studies of disease prevention literature on evaluation.

Prerequisites: HB 641 [Min Grade: C] or HB 641Q [Min Grade: C]

HB 660. Adolescent Health: A Social and Behavioral Perspective. 3 Hours.

Designed to provide students with the most current knowledge and analysis of issues influencing the health and well-being of adolescents. Theoretical frameworks that draw on an ecological perspective will provide a better understanding of how families, peers, schools, and neighborhoods influence risk and protective factors in youth. Emphasis will be placed on the relevance of adolescent health issues for the science of Health Behavior and the broader public health arena.

HB 681. MSPH Directed Research I. 3 Hours.

MSPH Directed Research I provides MSPH students with the opportunity to work closely with a faculty mentor in the design of a health behavior intervention and collection of data. This course is the first in a three-course sequence that culminates in the presentation of research findings to their faculty mentor and other faculty in a public forum. As such, HB 681 focuses on the development of a health behavior intervention in an area of the student's expertise, including consideration of the PRECEDE/PROCEED model, study population, data collection methods, IRB approval, study registration, previous research, and other activities in consultation with their HB mentor.

HB 682. MSPH Directed Research II. 3 Hours.

MSPH Directed Research II provides MSPH students with the opportunity to work closely with a faculty mentor in the design of a health behavior intervention and collection of data. This course is the second in a three-course sequence that culminates in the presentation of research findings to their faculty mentor and other faculty in a public forum. As such, HB 682 focuses on collection and analysis of data, interpretation of results, and significant progress in the drafting of a scientific manuscript reporting the research project and preliminary results, and other activities in consultation with their HB mentor.

Prerequisites: HB 681 [Min Grade: P]

HB 683. MSPH Directed Research III. 3 Hours.

MSPH Directed Research III provides MSPH students with the opportunity to work closely with a faculty mentor in the design of a health behavior intervention and collection of data. This course is the third in a three-course sequence that culminates in the presentation of research findings to their faculty mentor and other faculty in a public forum. As such, HB 683 focuses on analysis of data, interpretation of results, completion of a scientific manuscript reporting the research project and preliminary results, other activities in consultation with their HB mentor, and the presentation of results in a public forum.

Prerequisites: HB 681 [Min Grade: P] and HB 682 [Min Grade: P]

HB 689. Health Behavior Integrative Learning Experience. 2 Hours.

The HB ILE or capstone course represents a culminating experience that allows students to demonstrate synthesis of foundational and concentration competencies. This course will provide students with the opportunity to use skills gained during the MPH Health Behavior program to develop a high-quality written product that addresses health disparities from a behavioral and social sciences perspective and is ideally useful for an identified stakeholder. All MPH Health Behavior students must complete this course to graduate in the final term of the MPH program.

Prerequisites: PUH 688 [Min Grade: C]

HB 692. Principles and Practices of Community Organization. 3 Hours.

Seminar designed as an integrative experience for persons working with community groups. The focus is on learning to use available resources and advocating change to maximize community involvement.

HB 695. Seminar on Selected Health Behavior Topics. 1-3 Hour.

Seminar covering a variety of health behavior topics.

HB 696. Scholar to Career: Essential Skills to Success. 1 Hour.

This course is designed to prepare graduate students in public health for success during their academic journey and in their future careers. Students will gain exposure to diverse career paths through interactive discussions with PhD scholars, researchers, and teaching faculty who will share their experiences and professional trajectories. In addition, the course emphasizes practical professional development skills, including effective communication, networking, and career management strategies. Topics will include how to identify and approach mentors, draft professional correspondence, schedule and manage meetings, and cultivate habits for long-term career success.

HB 698. Master's Level Directed Research Health Education. 1-9 Hour.

Independent study with guidance of appropriate faculty. Includes activities such as literature review and evaluation. Course will be graded as Pass/No Pass. 1 - 9 hours.

HB 699. Master's Level Project Research Health Education. 1-9 Hour.

Research for project under direction of research project committee.

Course will be graded as Pass/No Pass. 3-6 hours.

Prerequisites: GAC M

HB 701. Theory-Based Measurement Development. 3 Hours.

The aim of this course is to introduce students to measurement development based on well-specified behavioral theories. This course will review and discuss key issues related to measurement development such as item/scale development, number of factors to retain rotation options and statistical programs. Prerequisite: Requires knowledge of elementary probability and statistics for non-statistics majors and BST 611. Course will be graded by letter. 3 hours.

Prerequisites: BST 611 [Min Grade: C]

HB 703. Writing for the Behavioral Sciences. 3 Hours.

The aim of this course is to develop and fine-tune scientific writing proficiency. In this course, students will read and critique a variety of books, essays, and articles about science and medicine, and complete numerous writing assignments and participate in peer review.

HB 704. LGBTQ Health and Wellbeing Service-Learning. 3 Hours.

The hybrid service-learning course will examine LGBTQ health and wellbeing. Specifically, it will take the knowledge learned from courses associated with the LGBTQ health and wellbeing certificate program and enable the students the opportunities to put it into practice. Students will have a range of opportunities to explore what LGBTQ health and wellbeing looks like in practice. Topics include issues related to LGBTQ risk and resilience, policy and programmatic approaches to LGBTQ health and health and wellbeing, as well as the concrete advocacy and leadership skills needed to address the most pressing inequities faced by LGBTQ communities in Alabama and the Deep South. Service-learning is a high-impact practice that combines community service with structured academic learning, including preparation, and reflection.

Prerequisites: HB 607 [Min Grade: C] or HB 707 [Min Grade: C]

HB 707. Introduction to LGBTQ Health. 3 Hours.

This course will survey current LGBTQ health topics, including 1) Defining evolving terms and concepts; 2) Risk and resilience - physical, mental, and behavioral health among LGBTQ individuals; 3) Theories guiding LGBTQ research; 4) Analytic considerations when conducting LGBTQ health inequity research; 5) Ways to improve the provision of services for LGBTQ individuals; 6) Overview of key, local, national, and global policies impacting LGBTQ individuals; and 7) Meaningful integration of LGBTQ communities in policy, programs, and research.

HB 709. African American Health Issues. 3 Hours.

This course will explore issues of both physical and psychological issues of African Americans historically and today. Historical, sociocultural and economic factors that affect the quality and utilization of healthcare services in African American communities will be examined. We will examine the risk and protective factors for specific health conditions. We will also identify evidence-based ways to engage the community and draw on individual and community strengths in prevention and treatment. Students will be equipped and empowered with the knowledge and skills required to develop a Community Action Plan aimed to improve the effectiveness of interventions targeting the African American community.

HB 710. Mental Health Promotion and Professional Development. 1 Hour.

In this course, students will gain knowledge about mental health topics relevant for graduate students, professional students, and postdoctoral fellows and learn skills for managing personal mental health, supporting others' mental health, and intervening when concerned about someone who may be considering suicide. In addition to course credit, students will earn a certificate in QPR Suicide Gatekeeper Training.

HB 711. Advanced Public Mental Health Promotion: Service Learning. 3 Hours.

This advanced course on mental health promotion focuses on evidence-based approaches, innovative service delivery models, and research-practice partnerships to address public mental health. Students acquire skills and hands-on experience related to thinking critically about evidence based approaches, innovative service delivery models, and research-practice partnerships to improve dissemination and implementation.

HB 712. Examining Health Inequities in Social and Behavioral Sciences. 3 Hours.

This course is designed to provide a comprehensive overview of race/ethnic health disparities/health inequities in the U.S. Both historical context and more current perspectives of identified determinants of health will be discussed as contributors to current health inequities.

HB 715. Examining Health Inequities in Social and Behavioral Sciences. 3 Hours.

This course is designed to provide a comprehensive overview of race/ethnic health disparities/health inequities in the U.S. Both historical context and more current perspectives of identified determinants of health will be discussed as contributors to current health inequities.

Prerequisites: HB 641 [Min Grade: C] and HB 643 [Min Grade: C]

HB 716. Psychophysiology and Public Health: The Interface of the Mind/Body Connection. 3 Hours.

Psychophysiology is a branch of neuroscience that analyses the interfaces of mental states and physiological responses, and how they interact to affect one another and subsequently drive behaviors. This course introduces students to basic knowledge about neuroanatomy, learning/cognition, neurological processes, memory, human development, brain disorders, response patterns, and behavior change strategies as they relate to public health issues such as sexual behavior, drug addiction, cigarette smoking/vaping, and obesity. The course will also introduce principles of stress management and neurofeedback techniques. A biopsychosocial framework will be applied to a range of public health domains, using Maslow's Hierarchy of Needs to inform context and priorities for interventions.

Prerequisites: HB 624 [Min Grade: C] or HB 624Q [Min Grade: C]

HB 724. Advanced Social and Behavioral Science Theory. 3 Hours.

This course focuses on a thorough examination of theories and models of behavior change and their applications in both research and implementation in various fields of health promotion and public health. Basic knowledge of research methodology and statistics is required. Course will be graded by letter. 3 hours.

HB 730. Health Communication Research. 3 Hours.

This course is designed to investigate the role of communication theories and methods in promoting public health and preventing disease. Both theoretical background in communication and behavioral science and practical communication/intervention development methods will be addressed.

HB 733. Health, Place, and Society. 3 Hours.

Health, Place, and Society examines social, economic, and political trends within the context of contemporary public health outcomes. Class participants will have a detailed understanding of how the social determinants of health interface with 1) housing policy, 2) employment, 3) education opportunities, 4) economic policy, and 5) social movements. Special emphasis is placed on how these factors follow a measurable pattern affecting intangible outcomes including access to health-enhancing knowledge and tangible outcomes including neighborhood quality and proximity to clean air and healthy foods. Class activities and projects will take a solution-based approach.

HB 736. Advanced Research Intervention Design. 3 Hours.

This course is intended to provide doctoral students with expert knowledge and application skills for designing a range of public health interventions to change behavioral outcomes in various populations. Emphasis will be placed on skill-building for designing relevant, state-of-the-art interventions tailored to unique population subgroups, and adapting existing evidence-based interventions for use with new populations or in new settings. Students will use two textbooks in this course that they will also use in Part 2 of this course (HB-737: Advanced Intervention Implementation and Evaluation). In addition, weekly readings of scientific articles will be assigned. This course uses lecture and seminar format; class time will be structured around lectures, in-class activities, and class discussions of both the lecture and reading materials. Students will complete writing assignments and develop a comprehensive research intervention development and implementation plan that they will later build on and evaluate in HB-737. This course is required for PhD students in Health Behavior.

Prerequisites: HB 724 [Min Grade: C]

HB 737. Advanced Intervention Implementation and Evaluation. 3 Hours.

This course is the second in a series of courses intended to teach doctoral students how to develop, implement, and evaluate theory-based, consumer-driven behavioral interventions. Students will learn how to assess whether interventions worked, build evidence for effective interventions, and adapt, implement, and disseminate interventions. Assignments will include developing a comprehensive evaluation plan for a mock grant application and describing how to adapt an existing evidence-based intervention to a particular content area, outcome target, setting, or population; students will be expected to present their work in class.

Prerequisites: HB 736 [Min Grade: C]

HB 741. Advanced Research Methods in the Behavioral Sciences. 3 Hours.

This course provides an in-depth treatment of the major research designs used in the behavioral sciences. Emphasis is given to the randomized controlled trial as it forms the cornerstone of causal inference in scientific inquiry; however, other designs intended to approximate a randomized trial will be reviewed. The course will also examine methods of collecting, analyzing, and interpreting data. Other topics include evaluating published research that used the methods reviewed in this course, writing research proposals and reports, and ethical considerations. Students must have taken HB 641: Research Methods in Behavioral Sciences or its equivalent as a prerequisite.

HB 742. Mediation and Moderation in Behavioral Science Research. 3 Hours.

This course is an elective course for doctoral students in public health and related fields, designed to provide an exposure to statistical mediation and moderation. Mediation and moderation are central in social and behavioral science research. Mediation explains and tests the underlying mechanisms by which the predictor variable affects the outcome variable, while moderation specifies under what conditions the predictor affects the outcome. Statistical techniques investigating mediation and moderation are among the most widely used data analysis techniques in a variety of disciplines. The primary goal of this course is to provide students with theoretical concepts of mediation and moderation and hands-on experience with relevant analytical techniques. **Prerequisite:** Students should have taken courses on multiple regression such as BST 611, BST or other equivalent courses. Course will be graded by letter. 3 hours.

HB 770. Doctoral Studies Seminar. 1-3 Hour.

The broad intent of the course is to review current issues relevant to the field of Health Promotion/Health Education, critically examine the relationship between scholarship, research, ethics and funding and reflect and discuss theoretical aspects of Health Promotion/Health Education.

HB 795. Seminar on Selected Health Behavior Topics. 1-3 Hour.

This course will be used as faculty design and craft course topics based on specific interests. These courses will be taught on a doctoral level.

HB 798. Doctoral-Level Directed Res. 1-9 Hour.

Independent study with guidance of senior public health faculty. Course will be graded as Pass/No Pass. 1 - 9 hours.

HB 799. Doctoral Dissertation Research. 1-9 Hour.

Research for dissertation under direction of dissertation committee. Course will be graded as Pass/No Pass. **Prerequisite:** Students must be admitted to candidacy in order to register for this class. 1 - 9 hours.

Prerequisites: GAC Z
